

1. Can the detection angle of the Rd-03 module be adjusted?

Answer: It cannot be adjusted. The angle is related to the antenna placement of the module. The default detection angle is 120°

2. How much can the furthest effective detection distance of Rd-03 be set to?

Answer: The parameter is 0-15, the length of a distance door is 70cm, and the farthest is $15 \times 0.7 = 10.5$ meters through calculation
